Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX OF PROPER NAMES.

Abbe, C. ii, 182.
Adcock, R. J. i, 64, 120. ii, 61. iii, 61, 129. iv, 20, 181, 183, 190. v, 21, 22, 53, 149. vi, 113, 151. vii, 22, 189. viii, 126, 191. ix, 55, 91, 119. x, 27, 89, 120, 140, 149, 152.
Applegate, J. vii, 128.
Arnold, J. M. vi, 54, 182.

Baker, M. v, 24, 82, 143. x, 141.
Barbour, L. G. iv, 114, 169. v, 73, 180. vi, 108. vii, 17. viii, 191. ix, 118. x, 25, 115, 150.
Beman, W. W. iii, 59. vii, 115. viii, 96, 114. x, 123.
Blakslee, T. M. ix, 15, 51.
Boije, C. O. ix, 108.
Boorman, J. M. ix, 120.
Borden, J. v, 41, 110.
Briot and Bouquet. v, 161.
Brooks, E. ii, 129.

Casey, W. P. v, 147. vii, 120, 162.
Chase, P. E. i, 73. iv, 147. viii, 56, 189. ix, 48.
Christie, A. S. vii, 185.
Church, I. P. i, 84. ii, 40.
Clapeyron. ii, 139.
Clark, J. G. i, 30. x, 57.
Comstock, M. L. i, 156. vi, 54.
Cook, H. ii, 185.
Craig, T. vii, 13.

DeForest, E. L. iv, 79, 107. v. 1, 65, 29. vi, 65, 140, 161. vii, 1, 22, 39, 54, 73, 105, 169. viii, 3. 41, 73, 137. ix, 33, 65, 135, 161. x, 1, 67, 97.
DeLand, T. L. i, 13. ii, 22.
Dixon, T. S. E. v, 20. ix, 1, 55.

Eastwood, G. iv, 77. v, 50, 170. vi, 22, vii, 58, 158. viii, 154. ix, 119.
Eddy, H. T. ii, 104, 126. iv, 192. v. 192. vi, 260. viii 57.
Edmunds, E. J. vi, 24.
Eggers, H. ii, 14. iii, 16, 100, 149. v, 181. ix, 54.
Eissfeldt, F. ii, 151.
Euler. vi, 14.
Evans, A. B. i, 189. vi, 149.
Evans, A. iii, 10, 75. iv, 65, 76. v, 161. x, 134.

Fermat. ii, 125.
Ficklin, J. i, 10. ii, 50. v, 177.
Fitz, N. iii, 50.
Frisby, E. i, 121. vi, 10.

Gauss. iii, 6. v, 19. viii, 83.
Glaisher. vii, 118.
Grassmann. viii, 96, 114.
Greene, D. i, 137.

Hall, A. i, 17, 81. ii, 89, 140. iii, 1, 127. iv, 36, 55, 146. v, 44, 192. vi, 33, 129, 171. vii, 82. viii, 83, 177, 188. ix, 26, 48, 129, 153. x, 65.
Hamilton. iv, 172. vii, 11, 33, 52, 65.
Hancock, E. vi, 16.
Hart, D. S. ii, 131. iii, 81. v, 118.
Hathaway, A. S. v, 38, 86.
Harvill, G. H. vi, 56. vii, 56.
Hayes, J. S. viii, 149. ix, 12.
Heal, W. E. iv, 88, 122. v. 143, 148. vi, 78. vii, 53. viii, 58, 98, 171. ix, 11. x, 55, 95, 142.
Heaton, H. v, 117. viii, 58. x, 48.
Hendricks, J. E. i, 1, 35, 46, 72, 210. ii, 64, 142, 199. iii, 109, 111, 152. iv, 71. v, 49, 55, 140, 175. vi, 32, 53, 83, 86, 183. vii, 55, 88. viii, 16, 160. ix. 90, 113, 176. x, 145, 149, 160.
Hendrickson, W. W. vi. 115, 180.
Henkle, W. D. i, 5, 75, 149. ii, 65.
Hilgard, J. E. iii, 117.
Hill, G. W. i, 27, 43, 53, 64, 141, 165, 200. ii, 4, 8, 48, 48, 52, 59, 79, 119, 161, 200. iii, 56, 65, 92, 112, 179. iv, 87, 97. v, 33, 105. viii, 33, 89. ix, 41.
Hillhouse, W. iii, 151. ix, 181.
Holcomb, J. B. i, 136.
Hoover, W. vii, 160. x, 49, 56.
Hyde, E. W. i, 60, 123. ii, 12, 76, 144. iii, 78, 97, 113. v, 39, 113. vii, 53, 137, 157, 177. viii, 17, 49. ix, 25.

Ingalls, J. M. vii, 89, 117.

Jacobi. v, 13.
Johnson, W. W. ii, 9, 39, 41, 106, 125, 127, 184. iii, 15, 42, 70, 103. 118, 156. iv, 1, 42, 143, 177. v, 7, 54, 176. vi, 17, 105, 119, 177. vii, 32, 52, 118, 198. viii, 200. ix, 29, 127, 133, 176, 185. x, 31, 44, 75, 76, 107, 129.
Jordan, William T. x, 136.
Judson, C. H. ii, 70. viii, 105. ix, 9. x, 74.

Kemper, D. iii, 17.
Kepler. iii, 37. ix, 17, 54. x, 65.
Kershner, J. H. v, 147. vi, 53. vii, 198.
Kirkwood, D. i, 2. ii, 181. v, 178. vii, 9. viii, 1.
Kummell, C. H. iii, 133, 165. iv, 117. v. 17, 97, 172. vi, 1, 41, 80, 97, 173. vii, 84, 145, 160, 163, 191. viii, 93. x, 121.

Ladd, Miss C. ii, 51. iv, 47, 172. v, 116, 145. vii, 147.
Lagrange. iii, 33. x, 27.
Lanza, G. i, 177.
Laplace. i, 57. iii, 34.

Ziwet, Alex., (1, 1), ix, 59.

GENERAL INDEX TO VOLUMES I–X.

A new method of finding differentials, i, 195.
Answers to queries, i, 29, 64, 56, 123; iv, 179; v, 55.
Additional formulæ in Finite Differences, ii, 8.
A new theory of the rule of signs, ii, 81, 97.
A demonstration of the Binomial Theorem for negative exponents, ii, 71.
Application of the exponential polygon to the hessian, ii, 104.
Answer to Prof. Hall's query, ii, 125.
Answer to Pres. Tappan's query, ii, 125.
Approximate quadrature, iii, 1.
A problem in surveying, iii, 58.
A new method of solving numerical equations, iii, 149.
Announcement, iv, 192; v, 192.
Approximate multisection of an angle, v, 172.
A problem and its solution, v, 181.
A case of symbolic vs. operative expansion, v, 38.
A problem and its solution, v, 45.
A question and its solution, v, 50.
A problem in Least Squares, v, 53.
A collection of proofs of the relation $r'+r''+r'''-r=4R$, v, 82.
A problem with solution, v, 86.
Answer to query at page 62, v, 147.
An account of Cauchy's Calcul des Residus, vi, 1, 41, 173.
Answer to query on page 142, volume V, vi, 22.
Answer to query on page 16, vi, 55.
Answer to query 1, on page 64, vi, 85.
Announcement of Vol. VII, vi, 191.
A fourth proportional, vii, 128.
A general solution of problem 292, vii, 145.
A quasi proof of the arithmetical mean, vii, 150.
Answers to queries in No. 4, vii, 164.
Announcement of Vol. VIII, vii, 199.
Answers to queries, viii, 58, 62, 98, 129.
Azimuth tables, viii, 67.
A brief account of the essential features of Grassman's Extensive Algebra, viii, 97, 114.
An investigation of the mathematical relation of zero and infinity, viii, 105.
A demonstration of Maclaurin's Theorem, viii, 149; ix, 12.
A general algebraic method for the solution of equations, ix, 1.
A pendulum whose time of oscillation is independent of its center of gravity, ix, 119.
A singular value of π, ix, 150.
Answer to Prof. Scheffer's query, ix, 150.
Announcement of Vol. X, ix, 196.
A new and useful formula for integrating certain differentials, x, 53.
A method of demonstrating certain properties of polynomials, x, 97.
Another solution of problem 435, x, 120.
Another solution of problem 434, x, 153.
Auroral and magnetic periods, x, 148.
An easy method of computing logarithms to many places of decimals, x, 143.
Announcement, x, 159.

Bipolar equations, ii, 106,
Book notices, iii, 32, 96, 132, 192.
Bibliographical note, and query, v, 143.

Comets and meteors, i, 17.
Cosmical mechanism, i, 73.
Crelle's Journal, ii, 51.
Cartesian ovals, ii, 106.
Correction of an error in Barlow's Theory of Numbers, ii, 140.
Calculation of radicals, iii, 100.
Classification of plane curves, iv, 42.
Curve of logarithmic sines, iv, 114.
Correspondence, v, 174; vi, 54, 182; vii, 54, 151; viii, 189; ix, 97; x, 44, 74, 105, 158.
Continued roots, v, 20.
Cubic equations, v, 117
Curve of pursuit generalized, vi, 108.
Computation of the cube root of 2, vi, 117.
Construction of the Metian Ratio, vi, 189.
Continuation of note at page 57, vii, 88.
Curve of pursuit, vii, 89.
Criticisms, vii, 185.
Centrifugal tides, viii, 188.
Complementary division, ix, 99.
Calculation of transit of Venus, x, 25.
Correction of an error in Bartlett's Mechanics, x, 75.
Cubic equations, x, 115.
Circular coordinates, x, 129.

Demonstration of two of Prof. Pierce's propositions, i, 156.
Discussion of an exponential curve, i, 84.
Determination of roots of Nth. degree, ii. 14.

Divisibility by seven, ii, 129.
Determinants, iii, 17.
Divisibility by prime numbers, iii, 25.
Demonstration of the differential equations employed by Delaunay in the Lunar Theory, iii, 65.
Differentiation, iii, 79.
Determination of the locus of O (See Fig. on p. 22), iv, 47.
Demonstration of Prop. XXV, Book I, Euc., iv, 122.
Demonstration of the impossibility of resolving algebraically general equations of a degree higher than the fourth, iv, 65.
Demonstration of a proposition, iv, 71.
Discussion of the general equation of the third degree, v, 110.
Demonstration of proposition on page 8, v, 87.
Discussion of an equation, v, 41.
Demonstration of a proposition, vi, 83, 151.
Determination of a sphere which cuts five given spheres at the same angle, vii, 13.
Demonstration of the Cissoid, vii, 23.
Determination of the area of an ellipse geometrically, vii, 72.
Determination of a meridian, viii, 63.
Discussion of a proposition, viii, 128.
Derivation of the formula on page 96, Vol. III, x, 27.
Differentiation of $f(x)=\log x$, x, 57.
Differentiation of the logarithm of a variable, x, 90.
Differentiation of exponential and logarithmic functions, x, 136.
Demonstration of the theorem of Apollonius and its reciprocal, x, 142.
Demonstration of a proposition, x, 151.
Dividing land, x, 150.

Elementary treatment of the problem of two bodies, i, 165.
Educational testimony concerning the Calculus, i, 133.
Equations of Differences, i, 8.
Editorial notes, i, 55, 72, 88; ii, 64.
Errata, ii, 32, 63, 96. 128; iii, 32, 64, 96, 164; iv, 32, 64, 160, 192; v, 32, 64, 96, 128, 160, 192; vi, 31, 64, 96, 128, 160, 192; vii, 32, 64, 104, 136, 168, 200; viii, 32, 136, 168, 200; ix, 32, 64, 96, 128, 160, 196; x, 32, 64, 96, 128, 160.
Extraction of roots by logarithms, iii, 172.
Extraction of roots, iii, 10.
Editorial remarks, iii, 32.
Experimental formula for the volume of atmospherical air, iv, 98.
Evolute to curve of logarithmic sines, iv, 169.
Enumeration of primes, v, 7.
Evaluation of Elliptic Functions of the second and third species, v, 97.
Equations of the third degree, v, 73.
Extension of the method of Least Squares, vii, 22.
Experimental determination of the formula for probable error, vii, 189.
Experimental confirmation of theoretical deduction, ix, 176.
Foliate curves, ii, 12.
First principles of the Differential Calculus, iii, 13.
Force of gravity in any latitude, iv, 20.
Formula for force of mortality, vii, 54.
Five geometrical propositions, viii, 174.

Graphical solution of cubic equations, i, 113.
Geometrical demonstration of a theorem i, 171.
Geometrical problem, i, 203.
Geometrical problem and solution, ii, 72, 73,
Geometrical solution of problem 125, v. 147.
General solution of problem on page 143, vi, 81.

General rules for the formation of Magic Squares of all orders, vi, 73.
Geometrical solution of problem 126, vii, 120.
Geometrical determination of the solidity of an ellipsoid, viii, 124.
General solution of the problem of any number of bodies, viii, 126.
Geometrical determination of the area of the parabola, ix, 106.
Geometrical determination of the solidity of a paraboloid, x, 46.

Historical sketch of American mathematicians, ii, 131.

Involution and evolution of imaginaries, i, 149.
Integration of polynomial differentials, i, 137.
Introductory remarks, i, 1.
Invention of a new numerical system, ii, 151.
Integration of five differential forms, iv, 175.
Introduction to differentiation, vii, 152.
Infinite series, viii, 191.
Integration of two differential forms, ix, 91.
Integration of the general equations of motion. ix, 110.
Integration of some general classes of trigonometric functions, ix, 177; x, 9.
Integration by auxiliary integrals, x, 81, 108, 137.

Kepler's Problem, x, 65.

Letter from Prof. Schiaparelli, i, 78.
Land surveying, iii, 109.

Limits of the Prismoidal Formula, iii, 113.
Least Squares, v, 21.
Law of facility of error in space of two dimensions, viii, 3, 41, 73.
Law of error in the position of a point in space, ix, 33, 65.
Limits, ix, 79.
Law of random errors, x, 140.

Motion of a sphere on an inclined plane, i, 62.
Mr. Glaisher's enumeration of primes, vii, 118.
Mechanics by quaternions, vii, 137, 177; viii, 17, 49.
Mr. Glaisher's enumeration of primes, ix, 133.

Note on the Binomial Theorem, i, 177.
Note on right-angled triangles, i, 63.
Note on sun spots, i, 51.
Note on the solution of quadratic equations, i, 204.
Note on the sound heard in conch and other shells, ii, 69.
Note on the significance of the plus and minus signs before radicals, ii, 70, 127.
Note on the reaction of continuous beams, ix, 138.
Note on the division of space, ii, 140.
Note on the solution of Mr. Holbrook's question, ii, 142.
Note by the editor, ii, 199; iv, 190; ix, 90.
Note on the correction of an error in the theory of polyconic projections, iii, 15.
Note on the solution of problem 78, iii, 16.
New demonstration and forms of Lagrange's Theorem, iii, 33.
Kepler's Problem, iii, 37.
Integration by series, iii, 38.
General theorem, iii, 39.
Notes, iii, 55, 74, 127, 140, 187.
Note on the polyconic projection, iii, 117.
New investigation of the law of errors of observation, iii, 133, 165.
Notices of publications received, iv, 32, 96, 127, 191.
Note, iv, 120, 148, 196; v, 49, 54, 55; vi, 54, 127; viii, 168.
Note on logarithmic series, iv, 88.
Notes on the history of the method of Least Squares, ix, 140.
Note on evaluation of indeterminate forms, iv, 177.
Note on attraction, iv, 181.
Note on the method of Least Squares, iv, 183.
Note by Artemas Martin, iv, 148.
Note on the correspondence of material forms with mathematical relations, v, 140.
Note on the solution of problem 217, v, 175.
Note on the polynomial theorem, v, 176.
Note on differentiation, vi, 22.
Note on the Catenary, vi, 119.
Note on the solution of problem 260, vi, 151.
Noto on a form of the equation of the tangent to a conic, vi, 180.
Note on Schulenburg's solution of the general equation of the fifth degree, vii, 53.
New demonstration of the Binomial Theorem, vii, 190.
Note on the computation of π, vii, 55.
Note of thanks, viii, 32.
Note by Prof. Scheffer, viii, 62.
Note by Prof. Seitz, viii, 98.
Notes on the theories of Jupiter and Saturn, viii. 33, 89.
Notes on Prof. Hall's query, viii, 57, 98.
Note on a special symmetrical determinant, viii, 169.
Notes on Gauss' Theoria Motus, viii, 83.
New demonstration of Prop. K, Euclid, Book VI, viii. 176.
Note on direction, ix, 15, 51.
Note on the solution of problem 361, ix, 25.
Note on the solution of problem 363, ix, 26.
Note on the solution of problem 373, ix, 91.
Note by Prof. Johnson, ix, 127.
New notation for Anharmonic Ratios, ix, 185.
Note on an indeterminate equation, x, 56.
Note by Henry Heaton, x, 48.
Note on Anharmonic Ratios, x, 76.
Note on bilinear tangential coordinates, x, 50.
Note on transformation of determinants, x, 8.
Note by W. E. Heal, x, 95.
New rule for cube root, x, 89.

On the differential equation of Dynamics, i, 200.
On the relative position of the asteroidal orbits, i, 2.
On the extraction of roots of whole numbers, i, 117.
On the stability of the solar system, i, 120.
On the summation of series, i, 121.
Operations on imaginary quantities, i, 5.
On the development of the Purturbative Function in periodic series, ii, 161.
On the maxima and minima of algebraic polynomials, ii, 1.
On the solution of cubic and biquadratic equations, ii, 4.
On the distribution of primes, ii, 9.
Odd numbers and even numbers, ii, 20.
On supplying omissions in land surveying, ii, 116.
On supplying omissions in a closed survey, ii, 182.
On the first principles of the Calculus, ii, 185.

On the solution of quadratic equations, ii, 21.
On the sum of the cubes of any number of terms of an arithmetical series, iii, 51.
On the expression 0^0, iii, 118.
On the history of the method of Least Squares, iv, 33.
On the rotation of Saturn, iv, 36.
On adjustment formulas, iv, 79, 107.
On the limit of repeated adjustments, v, 129.
On the angle between two lines given by their equations, v, 148.
On some properties of four circles inscribed in one, v, 116.
On repeated adjustments, and on signs of residuals, v, 65.
On the motion of the center of gravity of the earth and moon, v, 33.
On the roots of equations, v, 51.
On the grouping of signs of residuals, v, 1.
On the arithmetico geometric mean, vi, 10.
On the removal of terms from an equation of the fifth degree, vi, 78.
On the trisection of an angle, vi, 117.
On unsymmetrical adjustments, and their limits, vi, 140, 161; vii, 1.
On a theorem of Lambert's, vi, 171.
On the variation of the length of the day, vii, 9.
On some properties of polynomials, vii, 29, 73, 105.
Origin of the name Quaternion, vii, 52.
On the quadrature of curves and the cubature of solids by infinite series, vii, 47.
On the phenomena of the tides, vii, 154.
On a theorem in probabilty, vii, 169.
On the limit of planetary stability, viii, 1.
On the ratio of the area of a given triangle to that of an inscribed triangle, viii, 173.
On the elementary theory of errors, viii, 137.
On the computation of the eccentric anomaly from the mean anomaly of a planet, ix, 17.
On the computation of probable error, ix, 74.
On Mr. Hill's review of theory of moon's motion, ix, 82.
On the solution of equations, ix, 104.
On an unsymmetrical probability curve, ix, 135, 161; x, 1, 67.
On a new curve for the trisection of an angle, ix, 181.
On the actual and probable errors of interpolated values, ix, 143, 169.
On a remarkable property belonging to some cubics, ix, 108.
On the lunar and planetary theories, x, 15.
On the application of the method of Least Squares to the reductions of comparisons of line measures and to the calibration of thermometers, x, 33.
On the volume of some solids, x, 49.
On the effect of the earth's rotation on bodies moving on its surface, x, 145.
On the divisibility or non-divisibility of numbers by 7, x, 134.

Problem in curves of pursuit, i, 145.
Problems, i, 15, 34, 52, 71, 78, 112, 129, 148, 164, 212; ii, 30, 40, 63, 96, 137, 159, 199; iii, 31, 64, 95, 132, 163, 191; iv, 31, 63, 95, 129, 158, 191; v, 31, 63, 95, 127, 143, 159, 193; vi, 31, 64, 95, 127, 159, 190; vii, 31, 63, 103, 135, 167, 199; viii, 31, 62, 103, 135, 167, 199; ix, 31, 63, 95, 127, 159, 195; x, 31, 63, 95, 127.
Problem relating to the determination of circular orbits, i, 43.
Perfect cubes, ii, 65; i, 75.
Problem—To find the relation between the true and mean anomaly, i, 10.
Properties of polygons, i, 37.
Photographic observation of the transit of Venus, ii, 89.
Paradox for students, ii, 70.
Proof that no two different ellipses can be parallel, ii, 144.
Paradox, ii, 159.
Perfect cubes, iii, 104.
Problem—To fit together two or more quadrics so that their intersection shall be plane, iii, 97.
Problem 132, iv, 55.
Pedal curves, iv, 143.
Proposition, v, 8.
Publications received, v, 32, 64. 96, 128, 192; vi, 64, 96, 128, 160, 192; vii, 32, 64, 104, 136, 168, 200; viii, 32, 104, 136, 200; ix, 32, 64, 128, 160, 196; x, 31, 64, 96, 128, 160.
Proof of the theorem that every equation has a root, v, 80.
Proposition in Transversals, v, 113.
Problem relative to the move of the knight at the game of chess, vi, 181.
Parallel chords in an ellipse, vii, 82.
Proof of some remarkable properties in the method of Least Squares, vii, 84.
Proof of a proposition in solid geometry, vii, 157.
Plane trigonometry by quarternions, ix, 19.
Planetary mass and *vis viva*, ix, 48.

Quadrature of the circle, iii, 77.
Query, ii, 200; iii, 111, 192; iv, 48, 64, 122, 176; vi, 16, 64, 128, 191; viii, 16, 63.
Quaternions, iv, 172; vii, 11, 33, 65, 121.

Quinquisection of the circumference of a circle, v, 180.

Repetends, i, 14, 24.
Remarks on the stability of planetary systems, i, 53.
Recent mathematical publication, ii, 52, 79, 150; iii, 56, 112; iv, 87.
Reminiscences of William Lenhart, Esq., ii, 181.
Recent results in the study of linkages, iii, 42, 70.
Rational right angled triangles, iii, 47.
Revised solution of problem 89, iii, 189.
Reduction of the problem of three bodies, iii, 179.
Remarks by Prof. Pratt, iv, 55.
Revised solution of problem 218, v, 170.
Rectification of the hyperbola, v, 52.
Remarks on Mr. Meech's article on Elliptic Functions, v, 17.
Reduction of observation equations, vi, 97.
Remarks on the resolution in integers of the equation $(x+1)\ (x+2)\ \ldots\ (x+n) = y^2$, vi, 149.
Revision of proof of formula for errors of observation, vi, 80.
Reply to criticisms, viii, 10.
Response to a request, viii, 16.
Representation of the moon's path along the line of the earth's orbit, ix, 22.
Review of theory of the moon's motion deduced from the law of universal gravitation, ix, 41.
Remarks on the doctrine of limits, ix, 114.
Remarks on Prof. Johnson's query, x, 89.
Remarks on new rule for cube root, x, 127.
Reconsideration of solution of problem 239, x, 121.

Solution of a problem, i, 27, 60, 105, 154, 173.
Solution of problems, i, 46, 66, 86, 107, 125, 158, 179, 205; ii, 22, 23, 25, 50, 74, 184, 31, 54, 90, 121, 155, 191; iii, 26, 57, 63, 83, 121, 163, 188; iv, 20, 73, 21, 57, 98, 123, 149, 184; v, 24, 26, 39, 63, 88, 120, 150, 193; vi, 25, 47, 56, 88, 120, 152, 184; vii, 24, 58, 97, 132, 164, 193; viii, 25, 59, 98, 129, 162, 193; ix, 26, 58, 92, 121, 154, 189; x, 27, 57, 90, 124, 154, 151.
Solution of two indeterminate problems, i, 40.
Solution of similar indeterminate problems, i, 101.
Solution of an indeterminate problem, i, 151; ii, 46.
Solution of a question, i, 13.
Solution of a question in mechanics, i, 130.
Solution of a problem in surveying, ii, 18.
Solution of problem 49, ii, 61.
Solution of problem 67, ii, 119.
Solution of Mr. Church's problem, ii, 76.
Solution of Mr. Holbrook's problem, ii, 126.
Solution of the general biquadratic equation, iii, 50.
Solution of numerical equations of higher degree with secondary roots, iii, 52.
Solution of problem 94, iii, 59.
Solution of problem 89, iii, 61, 93.
Solution of an indeterminate problem, iii, 81; v, 118.
Solution of the pasturage problem, iii, 128.
Solution of the general equation of the fifth degree, iii, 141, 173; iv, 9, 49.
Solution of a problem in probabilities, iii, 152.
Solution of two problems in series, iii, 154.
Solution of problem 118, iii, 156.
Six original problems, iii, 186.
Singular solution of differential equations of the first order, iv, 1.
Some trigonometrical series, iv, 4.
Solutions of the six original problems in No. 6, Vol. III, iv, 15.
Short method of Elliptic Functions, iv, 129, 161.
Change from Alg. to Elliptic Functions, 130.
Connection with the spherical triangle, 132.
Increasing scales of moduli, 135.
Decreasing scales of moduli, 136.
Integration by series, 162.
Inverse method of integration, 166.
Special notice, iv, 159.
Short method of Elliptic Functions, v, 9.
Successive and simultaneous quadrature, 10.
Quadrantal quadrature, 12.
Integration of functions of 2d and 3d order, 14.
Solution of problem 206, v, 149.
Solution of the equation of the fifth degree, v, 161.
Summation of two series, v, 168.
Solution of problem 226, vi, 17.
Solution of problem 215, vi, 115.
Solution of problem 85, vi, 189.
Solution of a problem in mensuration, vi, 112.
Stellar parallax, vi, 33.
Symmetrical functions of the sines of the angles included in the expression $a_0 + (2k\pi \div n)$, vi, 105.
Solution of the general case of problem 87, Math. Visitor, No. 2, vi, 177.
Solution of special case of problem 288, vii, 115.
Solution of problem in curves of pursuit. vii, 117.
Solution of problem 292 with conditions changed, vii, 160.
Some relations deduced from Euler's Theorem on the curvature of surfaces, viii, 93.

Some examples of a new method of solving differential equations of the 2d order, viii, 154.
Solution of problem 331, viii, 58.
Solution of problems 353 and 354, viii, 161.
Solution of problem 393, ix, 55.
Solution of problem 417, x, 30.
Solution of problem 334, x, 55.
Solution of problem 436, x, 123.
Solution of problem 432, x, 152.

The plane triangle and its six circles, i, 189,
The four-point problem, i, 146,
The use of imaginary quantities in Analytical Geometry, i, 181; 2. 33.
The potential function, i, 97; ii, 145.
The correct method of Least Squares, i, 64.
The Besselian function, i, 81.
Tangency of hyperboloids, i, 196.
The recurrence of eclipses, i, 2.
To find the area common to two intersecting circles, i, 33.
The Paucellier machine and other linkages, ii, 41.
The problem of the pasturage, iii. 75.
The section of a circular torus, iii. 78.
Theory of parallels, iii, 103.
Trisection of an angle, iii, 151.
The rotation of Saturn, iv, 76.
Taylor's Theorem and its limits, iv, 137.
The differential equations of problem 165, iv, 147.
Twelve original problems, iv, 147.
To draw a circle tangent to three given circles, v, 166.
To find the differential of a variable without the use of infinitesimals or limits, v, 177.
The meteor of Aug. 11, 1878, v, 178.
To find the earth's distance from the sun, v, 141.
The polynomial theorem, v. 145.
The secular acceleration of the moon, v, 105.
The center of gravity of the apparent disk of a planet, v, 41.
The summation of series whose coefficients form an arithmetical progression of any order, v, 14.
The tangency problem, v, 53.
The motion of a satellite, v, 129.
The prunoid or plum curve, vii, 17.
The nine-line conic, vii, 147.
The secular displacement of the orbit of a satellite, viii, 177.
The great wheat fields, viii, 168.
The bitangential, viii, 171.
The density of the earth, ix, 129.
Table of square and cube roots, 120.
The multisection of angles, x, 41, 153.

Useful formula in calculus of finite differences, i, 141.
Ultimate proposition in attraction, v, 22.

Value of the Napierian base to 137 decimals, ix, 180.

Zero and infinity, ix, 9.
